

The Agentic AI Squad [External]

* Required

Project Details (Most Relevant)

9. Project 1 - What was the project *

1–2 lines: problem + what it does.

DocInsight is a document intelligence system designed to overcome the limitations of traditional plagiarism detectors which are being easily bypassed and exploited causing a breach in the fairness in educational institutions. It uses semantic AI and stylometry to detect paraphrased and AI-generated

10. Project 1 - What was your role? *

What you owned/delivered, key contributions

As a core member of the development team, I was responsible for designing and implementing key components of the end-to-end system. My main contributions included developing the semantic search pipeline using Sentence-BERT and FAISS, integrating the stylometric analysis module to detect shifts in writing style, and building the explainable reporting engine

11. Project 1 - What were the relevant skills for Agentic AI Squad? *

Enter 3–5 skills, ONE per line. Keep to keywords

Semantic Search & Retrieval (Sentence-BERT, FAISS, Cross-Encoders)
Applied NLP & Transformer Models (Fine-tuning, T5 for Summarization)
Machine Learning System Design (Multi-stage AI pipelines)
Explainable AI (XAI)
Vector Similarity Search
